

Are you planning a career in Medicine? Students from Abbotsford have gone on to very successful careers as medical professionals

Medical Schools require a strong background in the sciences. Abbotsford Schools prepare students to apply to top university Science Programs or Medical School Programs.

Nafeel Ahmed – 100 Percentile on the Medical College Admission Test

"Just wanted to let you know that I got my MCAT results back yesterday and I scored in the 100th percentile! I wouldn't be nearly as successful today without everything you taught us not only about chemistry but also about reasoning in exams rather than just memorizing."

Gao Runze graduated from WJ Mouat secondary and is currently doing his Post-Doctorate at Harvard Medical School

"I remember how excellent the science and math classes were; they prepared me well for my first year of university classes."

Shane Lloyd reached for the stars and was successful. He graduated from Robert Bateman Secondary, UBC, Penn State Medical School, and worked with NASA

"Students in Abbotsford have just as much opportunity to be successful in the sciences as anyone else at any other school. Mentors in the science department were instrumental in my pursuit of a career in science & medicine. I have had a number of opportunities to work with NASA over the years, and it is definitely the coolest science experience I have had."

Consult school profiles to see which classes are offered at each of our schools

Specialized Laboratory Preparation Class

This course has been developed to improve student success in university. Students perform university level laboratory research and technical report writing. Lab skills and critical thinking are emphasized. Students who have taken Specialized Science 12 report they are much better prepared than their peers in first year at college or university and excel in lab classes at university

Special Class in Sports Medicine

This class is especially for students pursuing a career in medicine, kinesiology, physical therapy or athletic training. Students learn about human physiology, nutrition and body mechanics. Students will also have hands-on training in athletic taping as well as learn how to treat various athletic injuries.
